

FileCopyService SonicESB Service (Install Notes)

Import/Upload the Service to Try:

Method #1: Use Sonic Deployment Import Tool (Simple and Fast)

1. Import FileCopyService.xar (Figure 1.0) – This method will load all required JAR files into /Resources/FileCopyService (Figure 1.1)

(Figure 1.0)

(Figure 1.1)

Name	Size	Type	Date Modified
FileCopyService.jar	2 KB	JAR File	Jan 27, 2008 6:32:29 PM

Now just ..

1. Create an instance of the service, specify the ENTRY, EXIT, Rejected and Fault Endpoint
2. Add the newly created service instance to the ESB Container of your choice
3. Add the Jar Files in /Resources/FileCopyService to the ESB container class path

Method #2 : Use Upload Through Sonic Workbench

1. Unzip FileCopyService_eclipse.zip into a directory on your system
2. Create a new Sonic Development Project
3. Import the service project into your new Project through Sonic Workbench (eclipse)
 - File --> Import --> General --> File System
4. Select the FileCopyService.esbstyp and upload the service
